

OFFICE REFRACTION POLICY ACKNOWLEDGEMENT

What is Refraction?

A “refraction” is the process of determining the optimal eyeglasses prescription for your eyes. If a refraction is performed there will be a charge of \$30.00. The cost of a refraction is not typically covered by insurance. However we would be happy to submit the refraction charge to your insurance provider, but you are responsible for charges not covered. If you are a Medicare patient you will need to fill out the Medicare Advanced Beneficiary Notice. The refraction is optional and is not part of the typical medical evaluation, but we would be happy to provide you with a new glasses prescription when possible.

I have read and understand the office policy on refraction. I also understand that this policy will apply to all of my future visits.
